FleetWave Store
Frequently Asked Questions

What is the FleetWave Store?

The FleetWave Store is a hub for FleetWave users to find prebuilt content, such as reports, KPIs and SmartForms for mobile app users, that can be easily installed without having to create from new.

What is the minimum version of FleetWave I need to get the Store?

Version 2.150.

Will I need to take a code release?

Yes - Any customer on a FleetWave version lower than 2.150 will need a code release to get the Store.

How do I activate the menus to access the Store?

The menus will appear automatically on taking a code release 2.150 or greater.

Will I have to pay for items on the Store?

No - In the current phase of the Store, all content available is free.
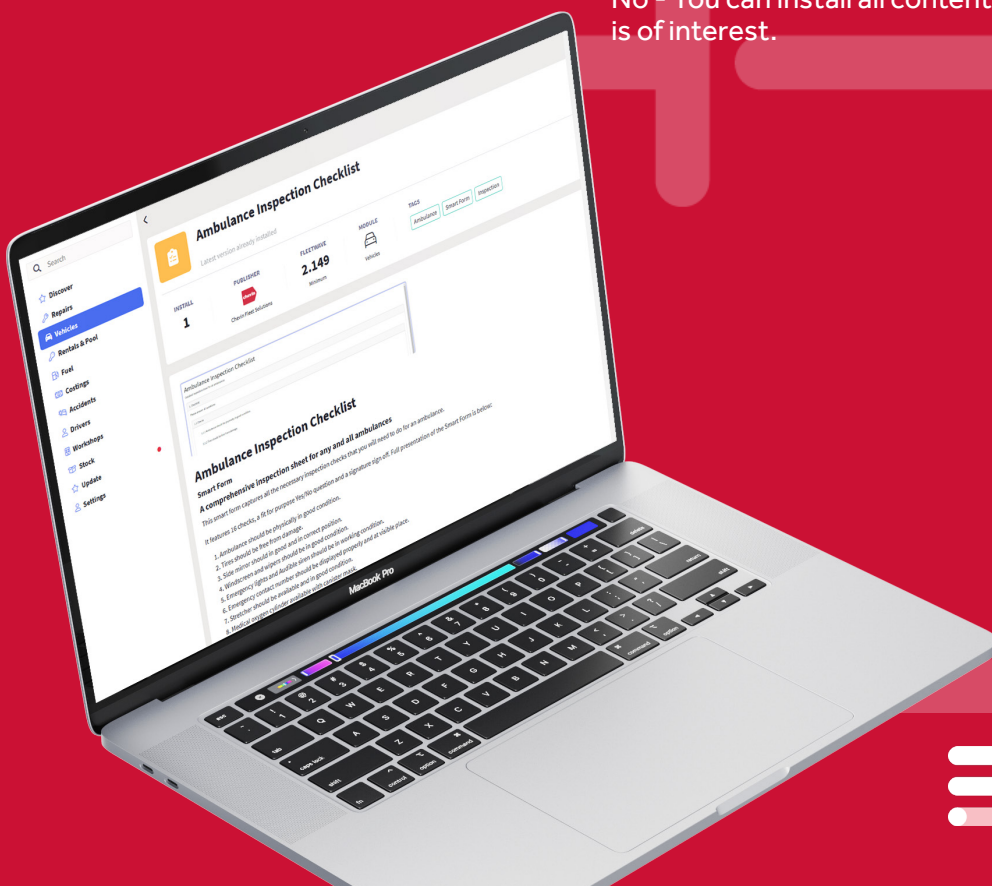

What can I install from the Store?

The Store currently has 3 types of item that can be installed:

- Dashboard KPIs
- Reports
- SmartForms

But the content doesn't stop there – new features and benefits will be added all the time, helping you maximise the power of FleetWave.

Is there a limit to how many items I can install?

No - You can install all content available on the Store if it is of interest.

What sort of information can I get about items on the Store?

Each item has a comprehensive description that breaks down what it is and the data it provides.

What is an 'item'?

An item in the Store refers to an individual piece of content e.g. SmartForms, Reports or Dashboard KPIs.

What is a 'bundle'?

A bundle in the Store refers to a collection of items (2 or more) that can then be installed all at once, rather than separately.

Which users can access/install from the Store?

Only System Administrators have permission to view and install content from the store.

Can I make changes to downloaded content?

Yes, as long as content exported to the Store is setup as editable.

About Chevin

We are deeply committed to advancing our customers and the global fleet industry, by developing fleet management software, designed to provide actionable, high value data insights. Our innovative solutions are used in over 180 countries to manage over 1 million vehicles and associated assets.

By prioritising investment in our people, product and processes, we continue to develop new ways to drive exceptional customer value and experience in order to support a safe, compliant and sustainable world.
