

All-new FleetWave® Dashboard

A decision layer that supports complex fleets

Combine intelligent capability with an intuitive experience, for faster and easier access to the decisions and insights that matter.

Purpose-built for complex or scalable fleet operations, it replaces static reporting and fragmented tools with a unified, governed decision layer.

Understand, and act on, your fleet data faster.

- ✓ Build dashboards without specialist input
- ✓ Structure data around how your organisation works
- ✓ Deliver role-based insight across operations, compliance, and maintenance

Get to the data that matters to you in minutes rather than days

Key product highlights

A faster path to insight

Our functionality includes self-service dashboard creation, wizard-driven configuration and rapid onboarding, reducing reliance on data experts and empowering you to make decisions quicker.

Built around your organisation

Every team can see what matters to them with role-based visibility by team, depot or function, configurable KPIs and widgets and data segmentation aligned to your needs.

From insight to action

Understanding your data is vital. Our real time alerts, exception tracking, drill-down functionality, and automated reminders allows you to visualise your operations quickly and act.

Why Chevin

Move beyond disconnected systems. Utilise FleetWave to unify your data using **SmartIntegrate** and visualise that data in the FleetWave Dashboard to reduce manual reconciliation and tooling costs while delivering consistent reporting for efficient decision-making.

One platform. One version of the truth.

Remove complexity

-  Manage your assets, appliances, vehicles, drivers, maintenance, compliance, defects, reporting and scheduling in one place
-  Take advantage of a modern and intuitive data management experience, putting ease of setup and ongoing data management at the heart of your operations
-  See your work orders, defect reports and vehicle and asset history to help back office and field teams manage their backlog and capacity
-  Standardised, audit-ready reporting across teams with consistent, trusted data
